

Internship (m/w/d)

We are **viable**, an interdisciplinary team of designers, strategists, and developers specialising in the **user-centred development of AI solutions and digital products**.

Our claim: ***Built with AI, designed for humans.*** Technology must not only work — it must create real value for people.

We design and build **tailor-made, AI-powered applications** that are meaningful, intuitive, and sustainable. We guide companies on their journey to digital maturity — from initial insights through the prototyping phase all the way to a scalable product.

We are viable.

We work on a wide variety of exciting projects across different industries. We offer diverse tasks, small teams, flat hierarchies, short decision-making paths, and flexibility in how we work.

We offer a **gross monthly salary of € 2,500**; higher pay is possible depending on qualifications and experience. Of course, there are many other benefits, such as a public transport ticket, subsidised lunches, fresh fruit, cold drinks, team events, and much more.

Your Responsibilities

You will work alongside our small team to support consulting projects, be involved in the research, innovation, and prototyping phases, and ultimately help shape the best, most innovative, and most valuable product for our clients.

Your Profile

We're looking for you if you identify with some or all of the following:

- Current student or bachelor's graduate in Business Administration, Economics, or Management
- Up to date with the tech scene
- Some experience with AI technology, or at least no reservations about diving into the topic
- Perhaps already worked in the technology department of a creative agency or consulting business
- Or even have experience with new media technology as well as team collaboration and prototyping software
- Comfortable with MS Office (PowerPoint, Excel, Word, Outlook)
- Highly motivated and proactive
- Organised with an eye for detail
- Fluent in both German and English — you feel equally at home in both languages

By the way...

If our collaboration is satisfying for both sides, a **permanent position** is absolutely possible.

How to Reach Us...

...send your application to karriere@viable.at or apply directly via LinkedIn. We look forward to hearing from you!
